The image shows a screenshot of the Codiqa mobile app development interface. The main workspace displays a mobile app preview for 'd.school' on a tablet. The app has a blue header with the text 'd.school' and a photo of children. Below the photo is a blue 'Divider' and a white 'Button'. The left sidebar contains a 'Components' panel with various UI elements like Page Header, Page Footer, Tab Bar, Nav Bar, Button, Text Link, Map, Heading, Text, Image, Collapsible, Grid, List View, Form Control, Text Input, Search Input, Text Area, and Toggle Switch. The right sidebar shows a 'LIST VIEW' panel for the selected 'Button' component, allowing users to configure its text, link, transition, theme, and other properties. The top bar includes the Codiqa logo, a 'Saving...' status, user information, and navigation links.

**Some years later...**
